

Product-minded engineer with **8+ years** shipping at scale and building **AI-native products and infrastructure**. Published an MCP gateway (aimux), AI invoice-extraction agents, and a portfolio MCP server. Uses **Cursor**, **Claude Code**, **OpenCode**, and **OMP** daily to drive agent-led delivery. Deep in **LLM integration**, **MCP protocol**, and **browser automation**, backed by systems shipped to **7M+ MAU** and **\$50M+ TVL**.

ASK AN AI ABOUT ME

claude mcp add janek-portfolio -- npx -y mcp-remote https://rahrt-portfolio-mcp-production.up.railway.app/mcp

EXPERIENCE

Rainbow Staff Engineer

Jul 2025 - Present

- › **Revived the Rainbow browser extension** after an extended period without an active maintainer: modernized the codebase and restored shipping velocity using **AI-native workflows** on **one of the most-used Ethereum wallet extensions**
- › Shipped **EIP-7702** and **EIP-5792** support, driving complex protocol implementations with agent-assisted development and collapsing multi-step dApp flows into single confirmations
- › Owning the extension's transaction pipeline end-to-end: dApp connector APIs, signing infrastructure, and product UX, all developed within an **agent-driven engineering loop**

Argent (Ready X) Senior Engineer · Lead Engineer

Aug 2021 - Jul 2025

- › Built Argent X from zero to **300,000+ Chrome users** with 5.0 stars across 89,500 ratings; owned full-stack delivery of extension UI, service workers, and dApp connector APIs
- › Co-developed **starknet.js** as core contributor; authored major v3 architecture; scaled it to **~115K weekly downloads** as the ecosystem's standard TypeScript library
- › Authored wallet connection standards and built **@argent/get-starknet** (~8,200 weekly downloads), progressively adopting AI tooling as the workflow matured

Vesu.xyz Founding Engineer via Argent Incubator

2024

- › Bootstrapped the full product from zero: lending/borrowing flows, real-time position tracking, and risk dashboards
- › Scaled protocol usage to **\$50M+ TVL**, becoming the largest lending protocol on Starknet

Joyn Software Engineer

Sep 2019 - Jul 2021

- › Built payment and user-management systems for the ProSiebenSat.1 / Discovery streaming JV
- › Shipped production software at **7M+ monthly active users** and 10M+ app downloads

OPEN SOURCE

aimux npm · @janek26/aimux	Next.js 134K+ stars	viem 3,400+ stars
AI model + MCP gateway that unifies LLM providers and MCP servers behind one OpenAI-compatible endpoint. macOS LaunchAgent, Linux systemd.	Contributor to Vercel's flagship React framework	Contributor to a leading TypeScript Ethereum library

SKILLS

LLM & AI INTEGRATION	MCP INFRASTRUCTURE	AI-NATIVE DELIVERY	ENGINEERING CORE	INFRASTRUCTURE
Vercel AI SDK - TanStack AI - OpenAI-compatible APIs - SSE streaming - RAG patterns - tool-use/invoke	MCP protocol - server & client SDKs - MCP federation/gateway - agent tool schemas - HTTP Stream transport	Cursor - Claude Code - OpenCode - OMP - agent-driven development - prompt engineering - agent skills	TypeScript - React - Next.js - Node.js - Hono - oRPC - Bun - API design	Cloudflare Workers - PostgreSQL - Drizzle - Docker - CI/CD - Railway - Playwright

AI PROJECTS

- Built **invoice-corp**, an agentic invoice automation system with browser-use, Playwright, Effect, and Cloudflare Workers
- Built **hollyway**, an AI SaaS starter with TanStack AI streaming, MCP tools, and Polar payments
- Built a **travel planner prototype** with CopilotKit, A2UI, and OpenRouter Responses

EDUCATION

- Self-taught engineer
- CS College dropout
- Continuous learning through OSS, agent-driven workflows, and production shipping

SPEAKING

- Building Web3 Tools That Matter*
- StarknetCC - Paris - 2023
- Web3 for Mass Adoption with Starknet and React Native*
- App.js Conf - Europe - 2022
